Summary

Java Backend Developer with **1.5+ years of experience** (Full Stack Internship and Java Developer intern) and a B.Tech in Electronics and Communication Engineering, specializing in Java and Spring Boot. Experienced in developing RESTful APIs, microservices, database-driven applications, and secure backend systems. Familiar with Spring Security, JWT authentication, PostgreSQL, inter-service communication, and Docker. Strong understanding of OOP, MVC architecture, and backend development best practices.

Technical Skills

Languages: Java, JavaScript, C
Backend: Spring Boot, Spring MVC, Spring Security, Spring Cloud, REST APIs, OpenFeign, JWT, RBAC
Frontend: HTML, CSS, React, Redux
Database: PostgreSQL, SQL, Spring Data JPA, Hibernate
Tools: Git, Maven, IntelliJ IDEA, Postman, Docker
Cloud & Deployment: AWS, Render, Supabase, Vercel
Concepts: OOP, MVC, Microservices, API Integration, Database Design
AI Tools: Microsoft Copilot, AI-assisted Development

Experience

Java Developer intern **March 2026 – October 2026**
Beagle Security

- Worked on API creation and implementation for core product modules, building and maintaining RESTful endpoints used across the application.
- Collaborated closely with the development team, participating in code reviews, sprint planning, and cross-functional coordination to deliver features on schedule.
- Contributed to the company's security testing product by developing and enhancing features such as issue tracking, bulk import, test results, and report generation.
- Worked with backend services to support end-to-end functionality for these features, from API design through integration and testing.

Full Stack Developer Intern **May 2025 – Feb 2026**
Bridgeon, Kakkancheri

- Architected backend services using Java and Spring Boot, improving API response efficiency and scalability.
- Designed and implemented RESTful APIs to handle business logic and data processing, ensuring reliable data flow.
- Integrated React frontend with backend APIs, enhancing user experience and reducing data load delays.
- Refactored SQL queries and optimized database operations, improving data retrieval performance.
- Applied MVC architecture to structure applications, improving code maintainability and scalability.
- Used Git for version control, enabling efficient collaboration and streamlined development workflows.

Projects

E-Commerce React Frontend Application | *React.js, Tailwind CSS, JSON Server*

- Developed a responsive e-commerce web application using React.js and Tailwind CSS with a modern UI design.
- Implemented state management using Context API for cart, wishlist, and user authentication features.
- Built and integrated a mock RESTful backend using JSON Server to manage products and user data.
- Designed and consumed REST APIs supporting CRUD operations.
- Implemented dynamic product detail pages and routing using React Router.
- Developed core features such as add-to-cart, wishlist management, and checkout flow.
- **Live Project:** car-beryl-three.vercel.app

Luna – Dress Shop E-Commerce Platform | *Java 21, Spring Boot 3, Spring Cloud, PostgreSQL, Docker*

- Developed a microservices-based e-commerce backend with API Gateway, User, Product, and Order services using Spring Boot, Spring Cloud, and database-per-service architecture.
- Implemented stateless JWT authentication and role-based access control (CUSTOMER / ADMIN) using Spring Security and Spring Cloud Gateway, with trusted identity propagation to downstream services.
- Integrated Order and Product services using Spring Cloud OpenFeign; implemented atomic stock reservation with conditional SQL updates and Saga-style compensating transactions to prevent overselling and restore inventory on checkout failures.
- Built order management workflows with Spring Data JPA, DTOs, and immutable order-item snapshots to preserve product details and prices at checkout.
- Containerized and deployed backend services using Docker Compose, Render, and Supabase; configured PostgreSQL connectivity and tuned HikariCP connection pools for cloud database limits.
- **Live Project:** luna-dress-shopping-website.vercel.app

Certifications

Java (Basic) Certification **Apr 2026**
HackerRank

Databases for Developers: Foundations **Apr 2026**
Oracle Dev Gym

Embedded C and AVR **Feb 2024**
Verdant IT Solutions

Leadership Experience

Social Media Head
College Arts Festival

- Managed social media campaigns and increased audience engagement.
- Coordinated promotional strategies to improve event visibility.

Publicity Head
Astronomy & Space Research Committee (AISA)

- Led publicity initiatives for technical events and programs.
- Managed communication strategies and outreach activities.

Education

Bachelor of Technology in Electronics and Communication Engineering **2021 – 2025**
Mar Athanasius College of Engineering, Kothamangalam *APJ Abdul Kalam Technological University (KTU)*
